01. RAMBLE: PHYGITAL RESTAURANT

A nonveg restaurant located in Ujjain, Madhya Pradesh. The main motive of the restaurant was to create a space that can give a physical as well as digital experience together. It has been designed in a dark theme so that the digital aspects such as 3d projections, and holographic menu cards can be easily experienced. Keeping it raw, the base material used is wood/ wooden textured laminates. For more engagement and for people's entertainment 3d camera is installed.

02. ARMANI STORE: RETAIL STORE

A retail store that brings two Armani sub-brands(Armani Emporio & Giorgio Armani) together at a place. The store has been located in Vasant Kunj, Delhi. It was designed combining two different design themes, the parametric theme and the futuristic theme. Being the parameric themed retail store, it was completely made up with one material, teak wood, as it gives a rich look to the store. inspite of changing rooms, smart mirrors have been introduced for the clothes trials.

03. THE KIDDIE CLOUD: PLAYSCHOOL DESIGN

This project aims to formulate a preschool in GIFT City, Gandhinagar. The intentional use of various shapes creates a graphic space, where each space would become a pedagogical tool. Also The colors and shapes facilitate the creation of a playful atmosphere for the kids. Targeting to the main audience i.e. kids from age group of 2-7 years, there are no as such differnt levels provided on the floor. More and more of open space is provided so that the kids can play easily outside and inside the campus.

04. THE MAPPLE TREE: RESIDENTIAL PROJECT, AHMEDABAD

The 3BHK has been designed for a Gujarati-Modern family of 4 in Ahmedabad following a modern theme. This project utilizes the neutrality of color to draw attention to a striking trichotomy of rough, smooth, and mid-grained textures. The kitchen specifically has been designed in such a way that the client can keep her bakery and home utilities segregated. As the family has many guests, a lot of open space is provided in the living area.

05. FURNITURE DESIGN:

K- CHAIR:

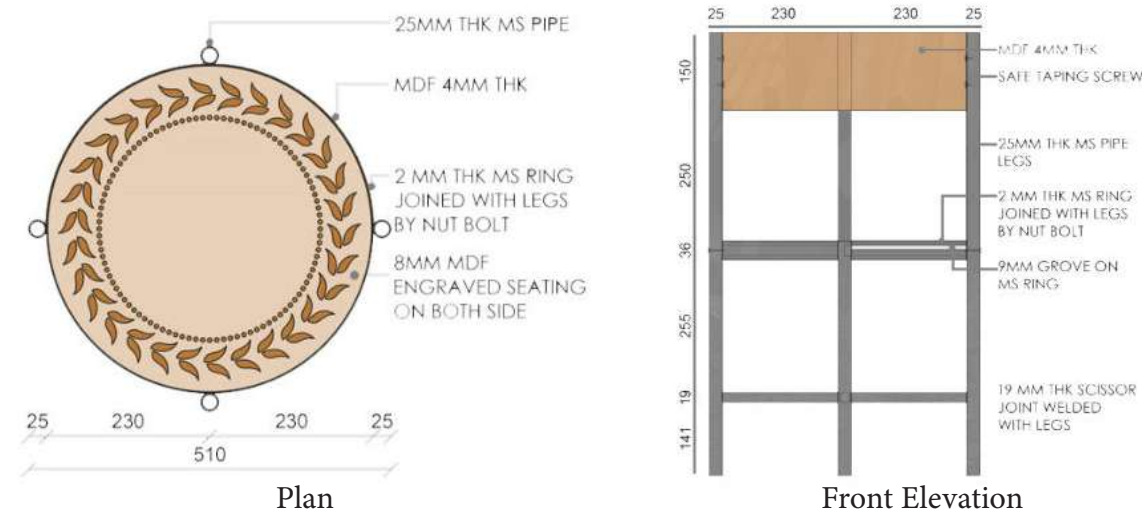

The scissor mechanism gets its name because the steel supporting beams under the work platform are hinged with pivot points to produce an assembly that looks like several sets of connected scissor blades. Using the same concept we designed a foldable chair, which can be used at compact spaces. MDF and Metal are used as the base materials.

Metal Pipes

MDF

Unlock the front and back leg of the chair.

Slide the legs towards side legs of the chair.

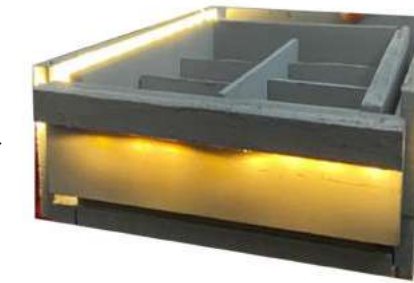

Rotate the seat and the backrest to fold the chair.

LIT-MED:

The drawers of the cabinet are designed to assist the patients with their medication, lighting up at their designated time. The smart furniture sends notification to the guardians so that they could give the medicine to the patient. But if for some reason the guardian is unable to give the medicines to the patient, notification would be sent to the assigned nurse so that she can give the dose to the patient.

06. WORKSHOPS:

AHMEDABAD DESIGN WEEK:

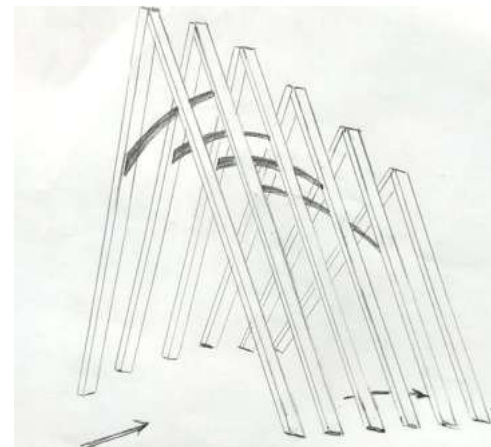

The installation was made for Ahmedabad Design Week Exhibition using the repetition form of designs. Repetition helps in creating a particular rhythm, cohesiveness, emphasis, and streamlines a design. After an interesting conversation and discussion, we finalised this conceptual design. We explored with the heights and angles of the vertical and inclined members.

MAKERS LAB:

An installation designed for a college exhibition- Praxis. Multiple pieces of plywood were cut into a particular shape and then fixed together with the help of plastic cable zips. It was a simple yet complicated installation as we faced many complications in figuring out how the pieces can be connected to each other.
